Plot Avg: 84.5

**Planting Date: 5/11/20 Population: 165000
Harvest Date: 10/8/20 Previous Crop: Corn**

Overall solid soybean numbers this year in the plot. The 3.4-3.6 RM range seemed to dominate due to the weather pattern this year. Good yields out of all trait packages across all companies.

This year we changed the way we do our test plots. They are done by a third party in a replicated block trial. Each variety is planted in multiple blocks then combined to get an average. This gives us more accurate data than one strip through a field.
