Tracking

Security and protection system, any of various means or devices designed to guard property against a broad range of hazards, including crime, fire, accidents, espionage, sabotage, subversion, and attack.

Building Management is a computer based centralized system installed in buildings that monitors and, where appropriate, controls certain key mechanical and electrical services (such as, Clock system, queueing system, Car park guidance, Automation system, HVAC, lighting, power systems, fire systems and security systems) to maintain a comfortable environment for building occupants.

Multimedia is the integration of multiple forms of media. This includes graphics / video and audio. For example, Television, Audio Visual, Intercom and Interactive Kiosk.

Telecommunications is the exchange of information over significant distances by electronic means and refers to all types of voice, data and video transmission. This is a broad term that includes a wide range of information transmitting technologies such as telephones, microwave communications, fiber optics and copper cable.
