

*Tantric massage like sensual massage improves health and vitality. Its modern meaning is the release of sexual energy in other words being in tune with your inner pleasure.*

*Tantric massage uses the basic massage techniques by warming the muscles and getting you to relax. Your body will be touched and stroked, the erogenous zones will be stimulated using different pressures to relax, tease and excite you - no contradiction intended. Your body will react naturally by releasing 'feel good' chemicals.*

*Please note I do not offer outcall services.*
