

2017 Wheat Variety Plot
 Wolgemuth Farview Farms Mount Joy
 Plant Date 10/11/16
 Harvest Date 6/28/17
 Field Average: 117
 Population: 1700000

Variety	Moisture	Bushel/Acre
AgriPro SY100	22.2	137
MBX17-P-275	20.2	122
MBX16-B-203	22.4	122
AgriPro SY007	17.2	120
MBX14-S-210	21.6	112
AgriPro SY547	22.1	111
Pioneer 25R61	21.5	110
Hilliard	22.6	107
MBX17-M-245	19.2	106
AgriPro Branson	17.7	101

Field Notes

AgriPro SY100 looks to be strong new variety for the future. Seems to hang onto moisture later than other varieties. Was starting to lean in spots, when pushing yield a growth regulator should be applied to aid stalk strength.

MBX17-P-275 strong showing in plot with nice appearance. Stood well in high yield environment. Seems to hold onto moisture longer than I would expect for an early maturing wheat.

AgriPro SY007 Consistent showing this year everywhere it was, again the favorite for early maturing wheat. Great appearance at harvest with dry straw.

MBX17-M-245 plot doesn't do the variety justice in my opinion. Majority of field was this variety and it averaged 117B/A. Nice short stalk with excellent strength. Held moisture a little longer than I expected.
