

**COMING BACK TO
BUILDING
BRIDGES**

SOCIAL STORY

SOME THINGS ARE GOING TO CHANGE TO HELP ME STAY SAFE AND HEALTHY

There are going to be new rules I must follow so I do not spread germs!

Germs can spread easily; I must make sure I follow the new rules.

GETTING DROPPED OFF!

When I get to Building Bridges I am going to wait in my car before going inside.

It is important to wait in my car, so I do not spread germs to other people.

Waiting can be hard, but once it is over, I can see my therapist.

WE MIGHT LOOK A LITTLE DIFFERENT IN OUR FACE MASKS!

Face masks help protect us from germs and getting sick.

Everyone at Building Bridges will be wearing face masks, shields and gloves.

There are a lot of different kinds of face masks.

When I see face masks, I might start to feel scared, if I am feeling scared, I can practice taking deep breaths.

NEXT, I NEED TO GET MY TEMPERATURE TAKEN!

Someone wearing a mask, or a face shield is going to take my temperature while I am waiting in my car!

The thermometer will be held up to my head and will take my temperature super quick! It doesn't hurt.

If I am feeling scared, I can try squeezing my hands or taking deep breaths.

AFTER I GET MY TEMPERATURE TAKEN, MY THERAPIST WILL GET ME FROM MY CAR!

When my therapist gets me from my car, I am going to go with them in the building through the front double doors.

Our moms, dads, grandmas, grandpas, aunts, uncles and whoever else might drop us off at Building Bridges have to stay in the car and cannot come inside with me.

This is so I do not spread more germs!

They will be in the parking lot when I am done with my therapist.

WHEN I GET INSIDE BUILDING BRIDGES THINGS MIGHT BE DIFFERENT!

I might be in a different room with my therapist or the same room. It could be different every time!

I might not be able to see my friends or walk around the center as much. This helps us stop the spread of germs.

My therapists will be wearing masks, shields and gloves, just like the people who took my temperature in my car!

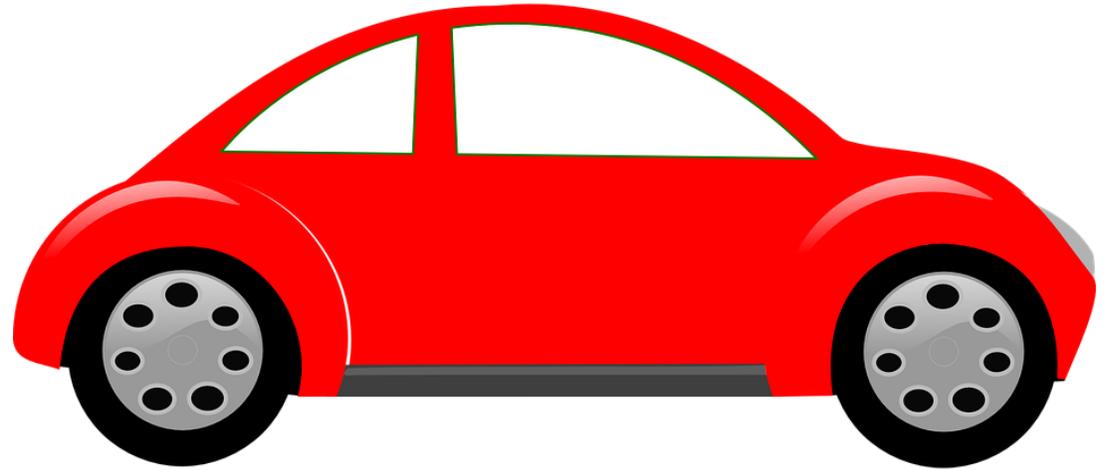

WHEN THERAPY IS OVER MY THERAPIST IS GOING TO TAKE ME BACK OUT TO MY CAR!

My family won't be waiting for me in the lobby.

This might make me feel sad at first, if I feel sad, I can tell my therapist how I am feeling.

This will help keep germs from spreading!

ALTHOUGH THINGS ARE A LITTLE DIFFERENT RIGHT NOW...

We are SO excited to see you!!

Here is some videos of our friends
wearing masks and saying hi!
