Take Your Classroom to Hyper Speed: Using the HyperDocs Concept with all Google Apps Tools

HyperDocs create an interactive learning experience for students, allowing them to explore content, create and curate digital artifacts that demonstrate what they know, think, feel, and understand. The misconception about HyperDocs is that they are simply Google documents with hyperlinks in them. However, when used appropriately, they can transform teaching and learning into interactive, engaging, student-centered environments. Similarly, a HyperDoc doesn't have to be only a Google Document, in this session we will explore how to use the HyperDoc process to transform the learning experience using the full Google Suite: including Slides, Forms, Sheets, Drawings, and MyMaps. Participants should bring a Chromebook or laptop to the workshop. Cost is FREE.

Here is the link for HyperDocs:

Tech Tools for Accessibility

Technology has afforded schools the opportunity to provide services for students that need extra support in their learning. While these tools can be utilized in a special education environment, they also have a great impact on all students. Join us as we explore what tools are available for devices using Google Chrome. Cost is FREE.
