

Reinvent your remote.

Enjoy simple solo control of all your shades in the palm of your hand. That's what the QMotion® Multichannel Remote provides. Seven channels give you control over six individual shades, six groups of shades, or all of them together, with one remote control. So much power, with so little effort.

- Each channel can have an unlimited number of shades programmed to it.
- Program as many as six shades or groups of shades to each channel.
- Every shade programmed to one of the first 6 channels is automatically added to channel 7 allowing you to control all shades from one channel.
- Up to three custom presets.
- LED feedback provides confirmation of your activity.

With the QMotion® Multichannel Remote you get innovation with impact. It's a step-saving practical solution that's surprisingly simple and elegantly efficient.

Motion activated zone indicator allows easy recognition of the active channel to help make programming simple and fast.
