3.2.2 ProQuest Nursing & Allied Health

Open via the Clinicians Health Channel <http://www.health.vic.gov.au/clinicians/>

The screenshot shows the ProQuest interface with a search for "permacol and hernia repair and abdomen". It displays 38 results, with the first result selected. The result is titled "Outcome of Abdominal Wall Hernia Repair with Permacol^{sup} TM^{sup} Biologic Mesh" by Cheng, Amy W, MD; Abbas, Maher A, MD; Tejjirian, Talar, MD. The journal is "The American Surgeon". The abstract snippet reads: "... Permacol) for hernia repair in contaminated fields. Hernia 2007;11:57-60 ...and parastomal hernias. Surgeon 2010 ...Parastomal hernia repair outcomes in". The interface includes filters for "Full text" and "Peer reviewed", a "Sort" button, and options to "Cite" or "Email" the result.

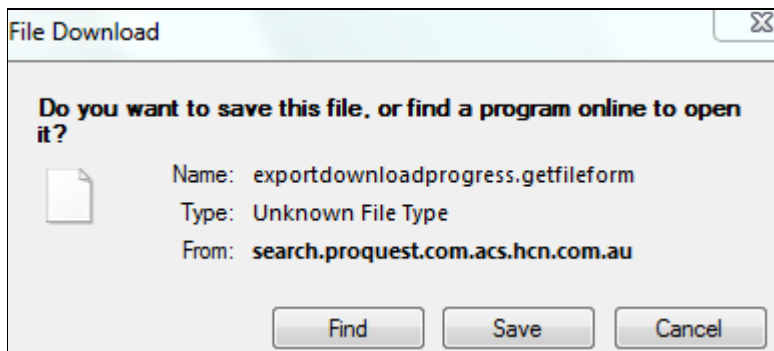

Select Citations

This screenshot shows the citation selection menu. The first result is selected, and the menu options include "Save to My Research", "Export/Save", "RefWorks", "EasyBib", "HTML", "PDF", and "RIS (works with EndNote, Citavi, etc.)". The "RIS" option is highlighted, indicating the user's choice.

...[More](#)>Export/Save>Output to RIS

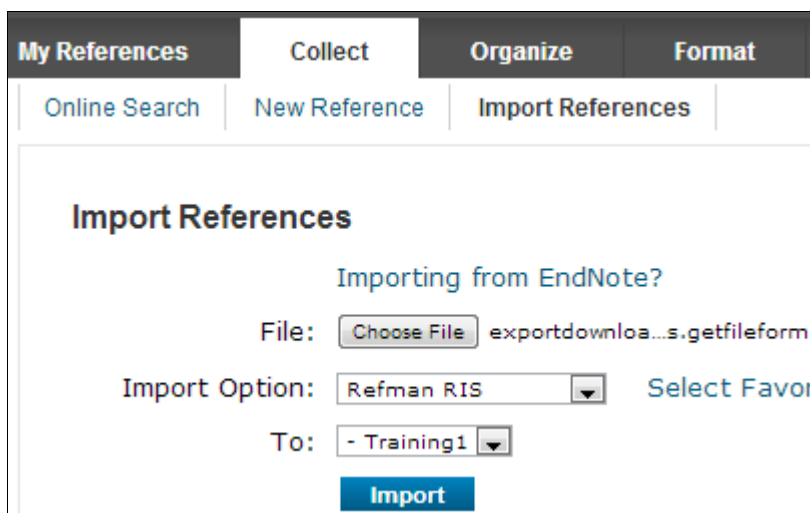

The "Export/Save" dialog box shows the following settings: "Items selected: 3", "Output to: RIS (works with EndNote, Citavi, etc.)", "Content: Citation, abstract, indexing", "Bibliography: Include bibliographic citations at the end", and "Citation style: APA 6th - American Psychological Association, 6th Edition".

Reference Type:	Journal Article	
Author:	Terroso, Miguel ; Rosa, Natacha ; Marques, Antonio Torres ; Simoes, Ricardo	
Title:	Physical consequences of falls in the elderly: a literature review from 1995 to 2010	
Year:	2014	
Journal:	European Review of Aging and Physical Activity	
Volume:	11	
Issue:	1	
Pages:	51-59	
▶ Attachments:		
Optional Fields:		
Abstract:	<p>In the last decade, population ageing has been registered as a global phenomenon. A relation exists between falling and ageing, since falling frequency increases significantly with age. In fact, one in three older adult falls annually. Although ageing is generically associated with decrease and degeneration of psychological and physical functions, it is still not common for the correct identification of risk factors to lead to a clinical prognosis of the elder being in risk of falling. Therefore, the goal of this review article is to identify, categorise and analyse typical ageing and fall factors mentioned in the literature as well as to quantify the number of times they were referenced. The research considered hundreds of publications, but analysis was then restricted to the 87 most pertinent articles written in English and published in journals or scientific magazines between 1995 and 2010. We concluded that falls among older adults can be characterised by the following: anatomic characteristics and physiological consequences of ageing; the pathologies that induce falls, which can be neurological, musculoskeletal, cardiovascular and other diseases; causes and risk factors of falls that can be behavioural, biological, environmental or socio-economic; type of physical consequences of falls, including fractures, bruises, injuries or other physical consequences; and strategies to prevent, mitigate or rehabilitate, which can be of a physical, environmental or behavioural nature.</p>

5. Use via remote access:

Clinicians Health Channel (<http://www.health.vic.gov.au/clinicians>)

Choose resource *eg* Medline on Ovid

OpenAthens link – log in with your Athens details

PS: You will need an additional Password from the Library to retrieve saved searches from your Personal Account

Within *Medline on Ovid* log into your Personal Account

Retrieve Saved Search

Log into EndNoteWeb (<http://www.myendnoteweb.com>)

6. Search within your EndNoteWeb references

You may choose to add data to a field *eg* **Label**. This will be displayed in your Reference. You can search for this from the **Quick Search** box.

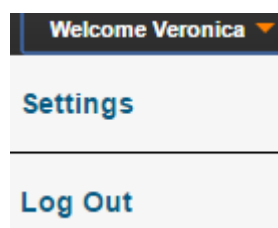

The screenshot shows the EndNoteWeb Quick Search interface. On the left, there is a search box containing the text 'fractures' and a dropdown menu set to 'Training1'. Below this is a 'My References' sidebar with options like 'All My References (35)', 'Trash (1) Empty', and 'My Groups' (Training1 (11)). The main area displays 'Quick Search: 1 result for 'fractures''. It includes a table with columns for Author, Year, and Title. The result is by Terroso, Miguel (2014) titled 'Physical consequences of falls in the elderly: a literature review from 1995 to 2010 European Review of Aging and Physical Activity'. The interface also features pagination controls and a 'Sort by' dropdown set to 'First Author'.

Author	Year	Title
Terroso, Miguel	2014	Physical consequences of falls in the elderly: a literature review from 1995 to 2010 European Review of Aging and Physical Activity Added to Library: 11 Sep 2015 Last Updated: 11 Sep 2015

To Log out

Click on orange down arrow beside your name on the top right corner

7. Add your citations to your document

Do this on your private computer as you are not permitted to download the Plug-In at work

Download Cite While You Write (EndNotePlugins.exe)

Install and choose CWYW-insert references and format citations and bibliographies in Word

(There is an option to save online references to your library in Internet Explorer)

Open your Word document (EndNoteWeb options will appear at the top)

Place cursor at the **end** of the word where you need to insert a citation

Click **Insert Citation**

Type Author's surname in Find box to search your EndNoteWeb Library

Select - it is inserted and the reference is added to a bibliography at the end of your document

Download a **reference style** eg Vancouver

You can change the Reference Style at any time

Important step to complete your document:

You must convert your document to a safer format for use independently of EndNoteWeb

eg when using Track Changes or sending your document to someone else:

Click Convert Citations and Bibliography

Select Convert to Plain Text

This creates a new document – save it with a separate file name
