

THE SHOOTING GAME

Setup - create two lines about 30 yards apart. Use cones to make a goal in the middle.

The Game-coach gives the ball to a team on one side. The opposing team sends a player into the goal.

Player 1 shoots the ball towards goal. If the goalie makes a save, he rolls the ball back to his O team and goes back behind the line with the rest of the O's.

Player 1 who shot now has to become the keeper. An O player will then take a shot on Player 1. If he scores or misses, the ball will roll to the other side. The player who shot, now becomes the keeper and Player 1 goes back with his team.

Eventually becomes a fast paced shooting game.
