

HOW TO WASH YOUR LAME' & MASK

NOTE: Hand wash only, per U.S.F.A. instructions.

Need: 1 bottle of Woolite
1 bottle of Windex

Lame' washing instructions:

Take 1 capful of Woolite and 1 capful (equal parts) of Windex and add to 1/3 sink full of **lukewarm** water. Place lame' in sink and allow to soak for 5 minutes.

Gently massage lame' in solution of water, remove, then **rinse, rinse, rinse, fully** in cold water, until **no** suds are seen. Allow excess water to roll off and place lame' on cloth towel.

Roll lame into towel and press **gently** to remove more water. Then hang on a **plastic** hanger to dry. **Do not dry in direct sunlight or outside, and do not use a hair dryer.**

A stainless steel lame' can be washed as often as you like, but a copper lame' can only be washed one time a week, **max**.

Mask washing instructions

Take 1 capful of Woolite and 1 capful (equal parts) of Windex and add to 1/3 sink full of **lukewarm** water. Place mask in sink and allow to soak for 5 minutes. ***Make sure mask is face up with the bib in the water.***

Stretch & massage bib. Rub water into inset of mask (padding), remove, then **rinse, rinse, rinse, fully** in cold water, until **no** suds are seen. Water can touch the grill. Allow excess water to roll off.

Place mask on large cloth towel, dry grill and ring bib into towel. Push with towel pads to dry until only damp to touch & dry grill. Allow to dry. Can use a hair dryer for speedy dry.
