

Banner Frames & Enclosures

These 3' x 10' metal frames link together to form fences, or enclosures (such as with the beer gardens shown). They are free standing if shaped appropriately and can be driven into soft ground if desired. The frames are fitted with snow fence panels Zip tied into them (some replacing of these ties will be necessary with each set up). If desired they can easily display your sponsor banners and were in fact designed to hold 3' x 10' banners. Flags that drop into the edges of the frames are available also to enhance the decorative appearance.

These may be assembled into squares or triangles and may be stacked two high to enclose light towers or other things on your venue while providing you a place to showcase your sponsor's banners.
