

EECE DEPARTMENT
PROFESSIONAL MASTERS
IN
ELECTRONICS AND TELECOMMUNICATIONS

The Department of Electronics and Electrical Communications Engineering (EECE) – Faculty of Engineering – Cairo University announces the start of the registration for its Professional Masters program for the **academic year 2017-2018** in the following two tracks:

- **Telecommunication Networks Track**
- **Embedded Systems Track**

This academic year represents the fourth intake for this degree, which started in September 2014. This new, non-thesis, degree is sponsored by and conducted in close partnership with the main local and multinational industrial corporations in the field of Electronics and Telecommunications, e.g. NTRA, Telecom Egypt, Orange, Etisalat as well as others. The aim is to establish a standard-setting program in terms of curriculum design and pedagogical approach, producing professionals tuned to the challenging needs of industry and capable of coping with the rapid pace of change of the information and communications technology.

The program addresses fresh graduates wishing to boost their chances of employability in industry as well as experienced engineers wishing to update their technical and managerial capabilities for a better career path. This unique program incorporates advanced engineering subjects delivered with a professional view as well as non-engineering subjects addressing the managerial, economic, financial, regulatory and legal aspects of the engineering profession. This is in addition to a project dealing with an industrial problem supervised by academic and industry experts. For a better student-instructor interactivity, the number of seats per track is limited. In consideration to your business, lectures are usually held on Saturdays as well as weekdays after 5:00 PM. A number of full and partial fellowships will be available for qualified students.

Information on the program is available at www.ecpm.eng.cu.edu.eg as well as at www.eecumasters.com. Requests for information can be sent to ecp.admin@eng.cu.edu.eg.

Important Dates:

Early registration and applications	June 5, 2017
Introductory Session about the program at EECE – Cairo University	TBD
Written Admission Test	September 6, 2017
Admission Interviews	September 10-11, 2017
