

What is Fluid Film?

Powerful Protection and Lubrication.

When the U.S. Navy needed to conquer the costs and delays of battling rust and corrosion in the ballast tanks of its thousands of combat and support vessels in World War II, an innovative West Coast chemist formulated a powerful weapon based on an unlikely ingredient: lanolin (wool wax). The savings were immediate. The costs of chipping, sealing and painting were greatly reduced. The new film penetrated corrosion and rust quickly. Application was simple. Protective action was long lasting and economical. The weapon was Fluid Film®, produced in a variety of easy-use forms by Eureka Chemical Company. Fluid Film® has been proved in some of the most severe conditions; Industrial, agricultural, raw-terrain construction - even on the space shuttle. Modified over time to adapt to environmental and application considerations, it's non-toxic, non-hazardous, contains no solvents and is environmentally friendlier. Fluid Film® continues to serve as the most effective corrosion control for industry, farming, industrial and transportation

Environment & Fluid Film

Fluid Film products are solvent free and consist of an all natural lanolin base, which contain less than 1% VOC in their bulk form. Remaining solvent free since the original formulation in 1943, the Fluid Film product line is made of the highest quality corrosion preventives and lubricants available on the market today. Fluid Film, when used on cutting devices, will not burn greenery

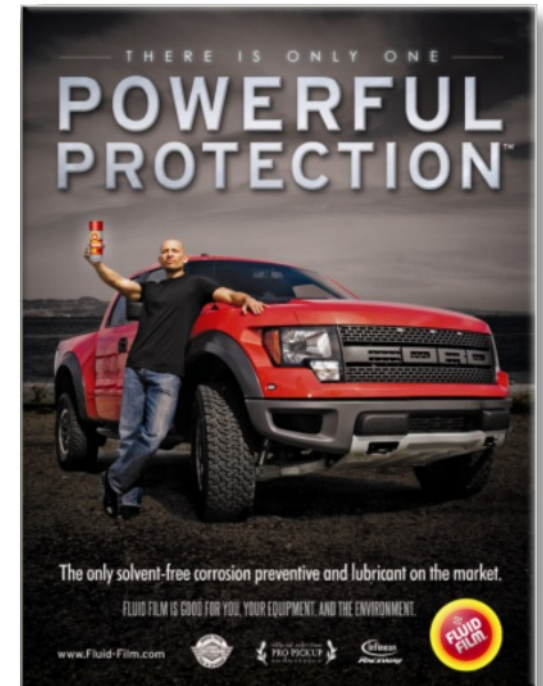

Leaders in Finishing Protection and Industrial Products

Agriculture

- Applicators & Transfer Pumps
- Augers
- Balers
- Battery Terminals
- Bin Slides
- Blades/Cutters
- Cab Door Hinges
- Carts
- Chains
- Combines & Combine Chains
- Control Cables
- Conveyers
- Cultivators
- Electrical Connections
- Fertilizer Spreaders
- Hedge Trimmers & Clippers
- Hinges
- Hoists
- Hose Reels
- Inside Chippers Shredders
- Irrigation Fittings
- Lawnmower Decks
- Locks
- Nursery Applications
- Preservation of Equipment Stored Outside
- Pruning Sheers & Saws
- Saws
- Slides
- Squeaky Leaf Springs
- Spreaders
- Tailgates
- Three Point Hitch Tractor Cables
- Tools
- Tractors
- Trailer Bails & Hitches
- Truck Beds (Before liner is installed)
- Welds

Automobile

- All Nuts, Bolts & Studs
- Aluminum Housings
- Automotive Lift Chains
- Bearings
- Brake Cable (emergency) and Speedometer Cable
- Brake Levers
- Car Jacks
- Chassis Squeaks
- Dashboards and Vinyl Upholstery
- Detailing Engine
- Distributor Cap Water Prevention
- Door Hinges, Opening & Locking Mechanisms
- Electrical Connections
- Engine Fasteners
- Fittings
- Hinges
- Hood & Trunk Mechanisms
- Hub Caps
- Locks
- Motorcycles
- Preservation Inside Doors
- Roller Tracks
- Rubber Bumpers, Moldings and Rub Strips
- Rusty Exhaust Bolts
- Seat Moving Tracks
- Sliding Doors
- Spare Tires
- Steering Swivel Spring Seats
- Throttle Cables
- Tools
- Trailer Attachments
- Uncovered Springs
- Under Wheel Arches
- Wheel Lugs
- Wheel Wells

Will Not Dry out or Evaporate
Not Water Soluble
Can be Applied Over Damp Surfaces
Non Conductive Reduces Static Electricity
Silicone / Teflon Free
Reduces Stress Corrosion
Non Toxic
Rust & Corrosion Preventive
“Wools Wax” Lanolin

Aviation

- Aircraft Under-Wing Bolts & Nuts
- Bilge Area
- Cabin and Cockpit Seat Tracks
- Cable Pressure Seal Lubrication
- Cable Pulley Lubrication
- Cargo Door Tracks and Rollers
- Clean & Lubricate Cable Turn-Barrels
- Cowlings and Fairings
- Dry Bay
- Electrical Connections
- Flight Control Bell Crank Lubrication
- Free Up Adjusters & Lubricate Same in Flight Control Assemblies
- Fuel Bay Cells
- Gravity and Single Point Refuel Compartments
- Helicopter Outer Interior Bays with Fluid Film & Fluid Film Liquid A
- Hinges & Guide Pins
- Horizontal Stabilizer
- Hydraulic Fittings and Unions
- Landing Gear Doors
- Liquid AR for Stabilizer Vertical Rods
- Main Landing Gear Wheel Wells
- Nose Wheel Well
- Pylon
- Rudder and Elevator
- Turrets & Aircraft Carrier Elevator Guide Rails
- Upper Deck Flight Control Rods
