

before the marriage, however, he and Maria had had a son named Alois. Although Johann Georg finally got around to marrying Maria, he did not bother to acknowledge and legitimize the son. So, the child grew up as Alois Schicklgruber.

Maria Anna died in 1847, and Johann Georg promptly vanished for 30 years, leaving the 10-year-old Alois to bat around from relative to relative. In 1877, the 84-year-old Johann Georg suddenly reappeared, with the spelling of his name now changed to Hitler. For some unclear reason, he testified before a notary and in the presence of three witnesses that he was the father of Alois Schicklgruber. So, the 40-year-old Alois became Alois Hitler.

During Johann Georg's absence, Alois had married in 1864 (as Alois Schicklgruber) Anna Glasl-Hoerer, who was 14 years his senior. It was not a happy marriage and after 16 childless years they separated in 1880; she would die three years later. Even before the separation Alois, now legally known as Hitler, had taken up with a young woman named Franziska Matselsberger, who bore him a son, also named Alois, in 1882. One month after his first wife's death in 1883, Alois married Franziska, and three months later she gave birth to a daughter named Angela. Shortly thereafter, Franziska separated from Alois and within a year she was dead.

Six months later, in January of 1885, Alois married his second cousin, Klara Poelzl. Four months later their first child Gustav was born, but he died in infancy, as did the second child Ida. Adolf was the third child of this third marriage. The next child, Edmund, died at the age of six years; the fifth and last child, Paula, lived to survive her infamous brother. His half-brother and -sister also survived him.

This, then, was the ancestry of the mad man who would become the architect of a so-called "master race." He left no known children, but in the waning hours of his life he married his mistress, Eva Braun. A few years earlier, he had forced his niece (daughter of his half-sister Angele) to become his mistress; she soon committed suicide.

In his book, Mr. Shirer speculated on whether the course of history would have been changed if old Johann Georg Hitler had not legitimized Alois. Adolf then would have been born Adolf Schicklgruber, and the author wondered if, with that name, he could have become the evil dictator of Germany. He found it difficult to imagine the frenzied German masses shouting "Heil, Schicklgruber" rather than "Heil, Hitler."

My own opinion of this unholy mess is that someone should have chopped down that family tree before Adolf ever became a twig on it.
