

To Whom It May Concern:

This letter certifies that Milton Industries' 500 series inflator gages are manufactured in accordance with the following specifications and tested to the standards contained therein.

1. Federal Specification GG-G-91D, Type III, Style 2
2. All 500 series gages have passed first article inspection and Milton Industries, Inc. is approved as a quality assurance manufacturer under Mil Spec. MIL-I-45208.
3. Each gage is individually inspected to ensure full compliance, including accuracy, with the Federal Specification referenced above. The accuracy tolerance range is +/- 2 PSI.
4. Milton's master gages are regularly verified with dead weight testers, certified by the National Bureau of Standards. Master gages are equipped with knife edge pointers for reading accuracy.
5. Milton Industries, Inc. is proud of the fact we have held the term contract for these gages with the U.S. Government for the past twenty five years.

Milton Industries is completely basic in the production of the 500 series inflators, controlling every step in the manufacturing, assembly and testing of each product. This provides us with complete confidence that every gage is 100% accurate when it leaves our factory.

Sincerely,

Milton Industries

9/2/2010
