

Designer Natural Shades

Beautiful hand-woven shades from the most exotic locations in the world.

WDS Designer Natural Shades offers gorgeous, functional woven wood window treatment solutions. The shades are intricate and the materials are simple, hand woven from plants and grasses mostly indigenous to China and Vietnam. The benefits of using an eco-friendly window treatment transcend the production process. Naturally woven shades aid in the reduction of electricity consumption for cooling and lighting a residence. WDS Designer Natural Shades can be a part of a general interior design strategy to improve the home and global environment.
