

265C

Wille 265 is agile and robust. Its minimum width is 1,200 mm and minimum height 1,990 mm. It weighs only two tonnes, and has operating hydraulics with a flow of 90 lpm. Wille's extensive range of work attachments and tires makes it a perfect partner.

465

Wille 465 is the best-selling Wille model. Its powerful loader and excellent stability are sufficient even for handling large volumes. The machine's agility, articulated steering and low construction height enable it to work efficiently even in restricted areas or in busy city traffic.

365C

Wille 365 is a powerful, agile and fast machine. In contrast to, for example, mini-tractors, various loading, piling and transport operations during the renovation of streets and green areas can be performed, thanks to the loader with extensive outreach, with one single machine.

655C

The Wille 655C is unrivalled in its weight category. Its operating range is extensive, thanks to the high travel speed of 50 kph. The great load-bearing capacity of the axles allows even heavy work attachments to be connected not only in the front, but also in the rear of the machine and on top of the engine compartment.

855C

The Wille 855C is really a multi-functional wheel loader, whose work attachments can be connected in the front, rear or on top of the engine compartment. Thanks to its low construction height, the machine can work even on sites where space is limited. The 130 HP engine has sufficient capacity for driving and thrust when used in snow ploughing or mowing.
