

Mr. Horton wanted to get a new video game. Don't Tell Becky! He didn't have any money so he borrowed some money from his mom and dad. He borrowed \$20 each from them. The game only cost \$37 dollars. So he when he got his \$3.00 in change. He gave one dollar to his Mom, one dollar to his Dad, and he kept one dollar for himself.

He still owes his Mom \$19 and his Dad \$19. Wait!! That is \$38 dollars. He kept one dollar so that is \$39. What happened to the missing dollar?
