

Dear Revamp Clients and Friends-

We need to talk shoes, shoes, shoes! Ok, so I love shoes and looking at an outfit without them is difficult for me because good style runs from your head to your toes. Many of you know that when we are “revamping,” the shoes as well as the clothes come on and off many times to get it right.

I’m really excited about the shoes I’m seeing on the fashion front for this spring and summer. There are extremely high wedge sandals and flat sandals, peep toes and closed toes, neutrals abound and fun colors to boot. Suede booties have transitioned to sandal boots and platforms are still everywhere for day and night. All this diversity makes shoe shopping more fun than ever and allows you to hone in on what works with your style and wardrobe. It is also a great time to take a chance and buy something out of your comfort zone, either a style you are not accustomed to wearing or a risky color. Springtime is the right time to think outside your traditional shoe box. The rain has finally stopped and walking weather is here. Have fun with your feet!

Spring cleaning is not just for the linen closet.....your wardrobe needs to be uncluttered and reorganized too. So give me a call. I can help you *revamp* and rejuvenate just in time to put your best foot forward for spring!

*Beth*
