Run these monthly calendar headings off on magnetic paper so you can mount them on your white board for regular review. Take out the current month's title and use it on your calendar. Your kid-dos can point to each month as the class reads, chants, or sings the monthly names. It's sure to help all students (even older ones) learn the months of the year!

Of course, you can do the same thing if you run them off on cover stock or heavy white drawing paper. Just laminate and staple them to your wall for many years of calendar fun!
