Southern New Hampshire & Northern Massachusetts Residential Turf Maintenance Program

Step 1 FERTILIZER WITH PRE-EMERGENT CRABGRASS CONTROL

DIMENSION 0.10% 19-0-6 30%PPSCU

- Best control will be achieved if applied and watered in prior to the soil temperatures reaching 60°F
- Provides post-emergent crabgrass control (in tillering stage)

Step 2 FERTILIZER WITH PRE-EMERGENT CRABGRASS CONTROL

DIMENSION 0.10% 19-0-6 30%PPSCU

- 2nd application has proven to be very effective in extending the length of crabgrass control.
- Provides post-emergent crabgrass control (in tillering stage)

Step 3 FERTILIZER WITH MERIT GRUB CONTROL

MERIT 0.2% 20-0-5 40%PPSCU 2%FE

- Controls white grub activity for up to 120 days
- Water in to activate the control

Step 4 FERTILIZER FOR SUMMER STRESS RELIEF

28-0-12 50% SCU 3% Fe

- Promotes sustained growth and greening
- Water within 24 hours for best results

Step 5 WINTERIZER

21-0-21 75%PPSCU

- High potassium for improved plant stress tolerance
