Employment History

Texas Department of Transportation-Austin Texas

(January 2014-Present)

Office of Commission &
Environmental Affairs Division

Environmental Air Specialist Policy Analyst

Analysis of EPA regulations for Criteria Pollutants. Responsible for advising transportation conformity measures for all Metropolitan Planning Organizations in nonattainment or near non-attainment. Provide expertise, technical advice of highly complex environmental studies for clearance of transportation activities. Responsible for advising federal affairs, commissioners, directors, on environmental and transportation legislative issues, policy decisions, and forecasts, advancing through the federal process.

United States House of Representatives-Washington, DC

(January 2011-January 2013)

Committee on Energy and Commerce

Senior Policy Advisor

Chairman Emeritus Barton

Worked on all policy areas under the jurisdiction of the Energy and Commerce Committee with a particular focus on energy and environment. Assisted in providing hearing topics to committee. Drafted floor statements for members of committee, hearing opening statements, witness questions, speeches and press releases.

Monitor regulatory activity by agencies affecting energy policy. Actively worked with staff and leadership, communicating between the House and Senate on policy considerations for the development of legislation. Represented committee in meetings with federal agencies, local, state, federal and international officials.

Specific works: Cross State Air Pollution Rule-Worked with all Texas members and staff to understand the impacts of the rule to Texas. Organized open forum discussions with Cass Sunstein, of OIRA. Wrote letter from all Texas members of Congress to, Lisa Jackson, EPA and Cass Sunstein, outlining concerns with ruling and modeling, used to include Texas in the rule, thus violating the APA.

Researched highly controversial health effects and human subject testing of fine particulate air pollution by the EPA. Initiated conversation about possible hearings related therewith Energy and Commerce Committee and Science Committee.

Researched conflicts of interest within CASAC board members giving advice for rulemaking to the EPA and their subsequent receipt of private research grants. Grid and transmission rules. Nuclear power and waste.

Day to Day: Draft floor statements, opening statements for members, witness questions, speeches and press releases. Monitor regulatory activity by agencies affecting Energy and Environmental Policy. Crafted legislation for senior counsel's review and use in bills to be proposed to committee.
