

Express yourself with Whispp

Assistive Voice Technology for people with a voice disability and people who stutter severely. Whispp's language-independent AI technology and calling app converts whispered speech and vocal cord-impaired speech into a clear and natural voice of your choice, without any delay. By providing recordings, your Whispp voice will even sound like your own healthy voice! For Whispp, your articulation quality should be good enough but It doesn't matter how your voice sounds. Whispp works for all kinds of voice disabilities and voice types, ranging from soft whispers to rough esophageal speech. Your Whispp voice even sounds like natural speech when you use an Electrolarynx.
