What should you look for when purchasing a great llama to add to your herd.....Style, conformation, pedigree, and disposition should be on the top of your list...with MBL Korbel you can check off all the boxes.

You immediately see her style and conformation. Her pedigree starts with Susan Kovac's sire Timabaland, an Inca Legend son, and her maternal pedigree goes back to White Heat. She's sweet, easy to handle and ready to show her stuff....as mentioned before, she checks all the boxes. MBL Korbel's sister MBL's Nevia was second highest selling female at last year's sale.
