

Augmenta1ly

It is an Augmented Reality (AR) app that helps people with learning disabilities like dyslexia easily read signage, paper, and other material in the real world.

Augmenta1ly is a one-stop platform that aims at making life easier on a regular basis, simplifying the process of interacting with objects and text-based data (such as billboards, street signs, hard copy documents, online data) that one may encounter with through the course of their day.

The application is fairly intuitive to use, simply point your device at the object at hand and let Augmenta1ly work its magic.

Keeble

Type confidently with this accessible keyboard

This accessible keyboard is designed to make typing in almost any iOS app easier and faster for people with physical and vision impairments, and also has features to support dyslexics. Keeble works in two ways - making it easier for you to type, and speeding up your typing. Visually, it's highly customizable - from colors to a wide range of fonts, including a dyslexia font. It's also designed to respond in ways which help you
