

JOEY'S AFTERCARE

Tegaderm eliminates the struggles of the healing process. No ointment or washing daily is needed. Leave Tegaderm on for 4 days(the day it's put on being day 1).. You can shower with the Tegaderm on within the 4 days, just be careful to not peel the edges.The tattoo will bleed and seep a little bit of excess ink during the 4 days...This is totally normal and nothing to be concerned with. On the 4th morning carefully take the Tegaderm off in the shower, wash the tattoo with soap and water and the palm of your hand thoroughly,(do not use a washcloth)! The tattoo will peel and flake within the next 2 days after taking off the Tegaderm. DO NOT pick or scratch at the tattoo while its peeling. Lotion or coco butter is optional at that point but not required. Your tattoo will be fully healed in the next 2 weeks, again in this time no more actions are required but may use lotion if desired. Enjoy your new tattoo!

However if the Tegaderm peels up or somehow comes off or if dirt, moisture, lint etc. can get under the Tegaderm patch due to a peeled up corner(example), then take the Tegaderm Patch off like explained above and wash like explained above and contact the artist immediately for further instruction or to schedule to stop up at shop for another one to be put on. Or if you have any other questions or concerns contact artist or shop and we will gladly help you!
