

An effective aid to Rehabilitating Down and Injured Livestock

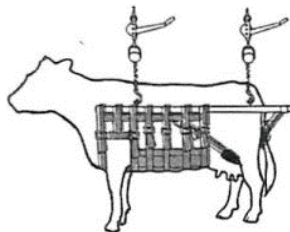

For
**Bovine, Equine, Canine,
Swine, Sheep, Goat,**
and other animals

Munks Livestock Sling brings a remarkable new idea to animal rehabilitation. This sling aids in getting the animal up on its feet, regaining proper circulation, eating and drinking habits, and restoring of normal bodily functions sooner. The sling supports the animal for over extended periods of time, while allowing the repair of torn muscle and nerve damage.

Designed by Farmers for Farmers

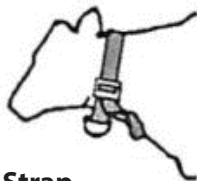

The designers and manufacturers, Don and Leonard Munks, come from a long tradition of dairy and cattle farmers. The idea started with their own cows, and like any good idea it caught on. Today, a multitude of additional uses are being discovered and implemented.

Bovine

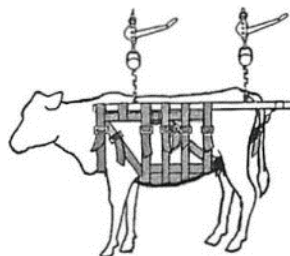

Large Sling

For downer cows, birth paralysis, milk fever, strained muscles, and trimming feet.

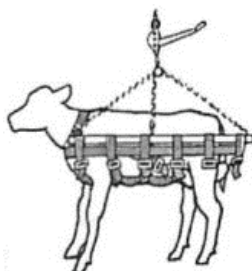

Neck Strap

Sizes for bulls, cows, yearlings, and calves. Specialty sizes also available.

Medium Sling

For feeder heifers and steers: Strained muscles, sickness, nerve damage, and fractures. 250 lbs. to 800lbs.

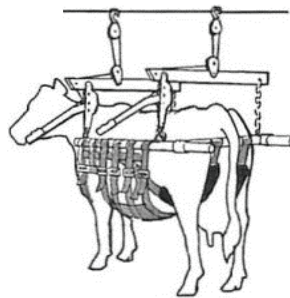

Small Sling

For calves: Birthing injuries, sickness, strained muscles, and fractures.

Weigh Sling

For birth weighing. Scale not included.

Low Clearance Lift

For suspending animals under low ceiling conditions (as low as 7ft).

Hobble

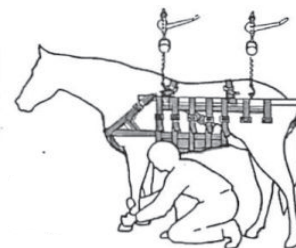

Velcro for ease of use. Double lock rings, sizes: 17", 19", and 21". Specialty sizes also available.

Calf Puller Strap

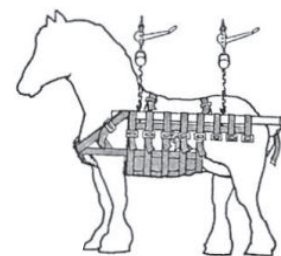

For pulling calves. Full body support and hand loops for leverage. Stainless steel D rings.

Equine

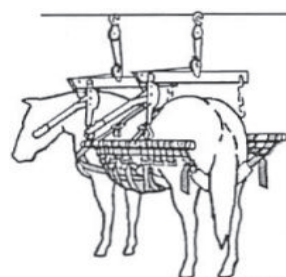

Large Sling

For fractions and strains of muscles and ligaments.

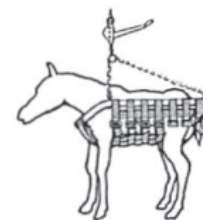

Draft Horse Sling

For fractions and strains of muscles and ligaments.

Low Clearance Lift

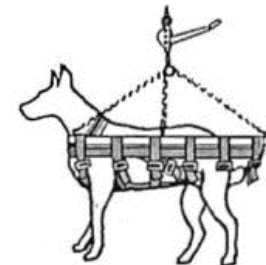

For suspending animals under low ceiling conditions (as low as 7ft).

Foal Sling

For birthing injuries, sickness, strained muscles, and fractures.

Canine

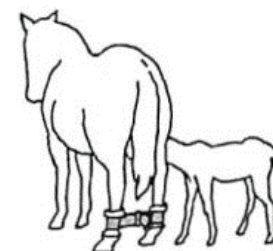

Small Sling

For back disease paralysis and post-surgery recovery.

Packer

For conveniently picking up and carrying dogs. For exercising injured dogs.

Hobble

Adjustable padded Velcro hobble.

Hobble

Padded one-legged Velcro hobble with "D" ring.

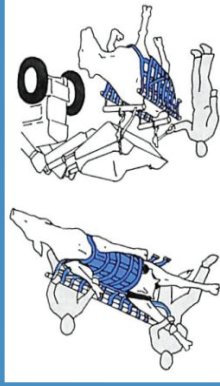

What you Purchase

Package includes sling, crossbar(s), cable puller(s), and detailed instructions on use. The sling itself is made with string-zinc-plated pipe and durable polypropylene strap webbing.

Munks Livestock Sling is also considered useful in zoo and wild game animal rehabilitation. Specialized slings can be produced upon request from the manufacturer.

IMPORTANT: Munks Livestock Sling can only be efficient as the people who use them. The manufacturer is not responsible for improper application or abuse of sling.

Lightweight, Durable, Easy to Use

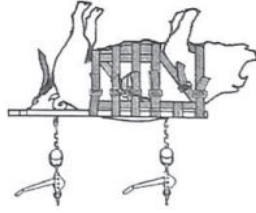

If the animal is down, roll it up on its back with the feet up, and place legs of animal through openings. Shove lower pipe as far underneath animal as possible. Roll the cow back down and attach crossbars. With small animals that are up on their feet, lay sling on the ground and step the animals into the openings and then lift. Animal can be lifted anywhere, inside or out, with tractor bucket or with cable pullers (provided in package) on a secured overhead beam or tripod.
