TEAM!**

EVOLUTION OF DENTISTRY:

How is your practice measuring up?

COURSE DESCRIPTION:

The rapidly changing landscape in dentistry has made complex cases, management of implants, integration of digital technology, oral-systemic science and interprofessional collaboration part of a routine day. How is your practice, your TEAM and your role measuring up to change? Understand HOW and WHY practices need to evolve fundamental systems and processes to address the evolving landscape of dentistry. Modern dental practice is more demanding than ever before, requiring TEAM members to utilize available evidence-based information to support treatment plans and interventions. Here's one for the TEAM!

DATE

Thursday, April 26, 2018

TIME

6:00 - 9:00 P.M.

Registration: 5:30 P.M.

LOCATION

Carlton Dental Lab
103B – 3725 Pasqua Street
Regina, SK
S4S 6W8

COST

\$99.00 per dentist (plus tax)

NANCY ADAIR - BA, DIP DH, RDH

Nancy's journey in dentistry/dental hygiene has enabled her to become a knowledgeable source of information on the evolution of dentistry. She encourages dental teams to see ALL of the awaiting opportunities and encourages teams to 'raise their bar' in dentistry! Nancy believes in 'sustainable science-based' practice builders whereby practices have a solid foundation. Nancy is a dynamic motivating international speaker and can be found at many high profile CE events. She is also a dental educator, past CE chairperson, a transition leader, a clinical 'lead' RDH, research team member on implants, a periodontal RDH and founder/owner of the CE company Hygiene Excellence Inc.. The CE company encompasses didactic elements, skill development programs and the means for superior clinical/practice performance. Nancy is known for 'The Working Model' approach and the PTM™ (Periodontal Therapist Module - Level I and II) which is igniting practices with a fresh new image.

COURSE OBJECTIVES:

Upon completion of the presentation, the participant will be able to:

1. **RECOGNIZE** 8 areas of interdisciplinary dentistry and appreciate the use of time-lines, 3 E's, comprehensive exams and treatment coordinators.
2. **EVALUATE** the level of technological integration by the TEAM to support evidence-based treatment plans.
3. **DETERMINE** how to best modernize/optimize practices using fundamental systems, processes and roles.

ANTHONY M. IACOPINO - DMD PHD

Anthony M. Iacopino DMD PhD completed the prestigious National Institutes of Health – National Institute of Dental and Craniofacial Research Dentist/Scientist Training Program in 1991 at the University of Medicine and Dentistry of New Jersey. From 1991 to 1999, Dr. Iacopino was a faculty member at the Baylor College of Dentistry. In 1999, Dr. Iacopino moved on to the position of Associate Dean for Research and Graduate Studies and Director of the Wisconsin Geriatric Education Center at the Marquette University School of Dentistry in Milwaukee. In 2007, Dr. Iacopino became the Dean of the Faculty of Dentistry at the University of Manitoba in Winnipeg, Canada where he established the first International Centre for Oral-Systemic Health (ICOSH) in January of 2008 and currently serves as the executive director. Dr. Iacopino has a national/international reputation in dental research and dental education having presented numerous keynote lectures/symposia at meetings for the National Institutes of Health, American Association of Dental Research, American Dental Association, and the American Dental Education Association. He has served on 6 NIH study sections and served as a manuscript reviewer for 32 dental and/or basic science journals. Additionally, he has been a contributing editor/editorial board member for 2 journals and has been a grant reviewer for 7 national and international organizations. He served as the Associate Editor for Grand Rounds in Oral-Systemic Medicine. Dr. Iacopino has been a consultant and key opinion leader within the dental industry for many years and has served as PI or Co-I on 28 research and/or training grants totaling \$12,000,000. He also has published 175 peer-reviewed manuscripts/book chapters and has presented 200 abstracts/invited lectures internationally.

COURSE OBJECTIVES:

Upon completion of the presentation, the participant will be able to:

1. **DISCUSS** the meaning and relevance of "oral-systemic medicine".
2. **DESCRIBE AND UNDERSTAND** the systemic inflammatory consequences of oral biofilm from periodontitis and implantitis.
3. **EXPLAIN** how dentistry has become a critical component of interprofessional collaboration for improving overall health through reduction of systemic inflammatory burden.
