Waters		substance which is eith	er an active ingre	dient of a pesticide to be disch	arged or a degradate of
				s either an active ingredient of attached documenting that the	

D. Endangered Species Protection: Complete Section D for each Pest Management Area for which coverage under EPA's Pesticide General Permit is desired. Copy this section for non-electronic submissions.

1. Federally Listed Threatened or Endangered Species (i.e., Species) and/or Federally Designated Critical Habitat

4	A. Pesticide application activities will not result in a point source discharge to any receiving water identified in Appendix XXX as containing NMFS-listed resources of concern for this permit.
	B. Pesticide application activities for which permit coverage is being requested will discharge to one or more receiving waters containing NMFS-listed resources of concern, but consultation with NMFS under section 7 of the ESA has been concluded for pesticide application activities covered under this permit. Consultations can be either formal or informal, and would have occurred only as a result of a separate federal action. The consultation addressed the effects of pesticide discharges and discharge-related activities on federally-listed threatened or endangered species and federally-designated critical habitat, and must have resulted in either:
	i. A biological opinion finding no jeopardy to federally-listed species or destruction/adverse modification of federally-designated critical habitat; or
	ii. Written concurrence from NMFS with a finding that the pesticide discharges and discharge-related activities are not likely to adversely affect federally-listed species or federally-designated critical habitat.
	C. Pesticide application activities for which permit coverage is being requested will discharge to one or more receiving waters containing NMFS-listed resources of concern, but pesticide application activities are authorized through the issuance of a permit under section 10 of the ESA, and authorization addresses the effects of the pesticide discharges and discharge-related activities on federally-listed species and federally-designated critical habitat.
	$D.\ Pesticide\ application\ activities\ were,\ or\ will\ be,\ performed\ in\ areas\ with\ NMFS-listed\ resources\ but\ only\ in\ response\ to\ a\ declared\ pest\ emergency\ situation.$
	E. Pesticide application activities for which permit coverage is being requested will discharge to one or more receiving waters containing NMFS-listed resources of concern. Eligible discharges include those from pesticide application activities performed consistent with appropriate measures to avoid or eliminate the likelihood of adverse effects as provided in writing from NMFS, and the Operator provides EPA with the required relevant supporting information from NMFS.
	F. Pesticide application activities for which permit coverage is being requested will discharge to one or more receiving waters containing NMFS-listed resources of concern. Eligible discharges include those from pesticide application activities that are demonstrated not likely to adversely affect federally-listed species or their designated critical habitat.

E. Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. On the basis of my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. I further certify that the applicant has sufficient title, right, or interest in the property where the proposed activity occurs.
