

## Octowax MR-40

## Wax Emulsion

CHEMICAL NAME: Modified hydrocarbon wax

PHYSICAL FORM: Aqueous, liquid emulsion

### PRODUCT SPECIFICATONS

### METHODS

Solids, %	39.0 - 41.0	WI-SCC-040
pH	9.5 - 10.5	WI-PHC-010
Viscosity, cps.	100 - 3000	WI-VDC-070

### PRODUCT DESCRIPTION:

Octowax MR-40 is a light amber-cream colored emulsion of an oxidized, modified hydrocarbon wax. The emulsion is based primarily on a nonionic surfactant, but is a mixture with anionic because of the amine-neutralized reactive components of the wax. Octowax MR-40 is suggested for use as a mold-release and lubricant.

All of the ingredients used in this product are listed on the TSCA Inventory, Australian AICS, Chinese IECSC, Korean KECI, Philippine PICCS, and the Canadian, DSL.

### STORAGE AND HANDLING:

Containers should be kept tightly closed; avoid direct sources of heat or sunlight when possible. Once a drum has been opened, it is important not to introduce bacteria into the drum. Make sure the part drum is used quickly and that all stock is rotated on a first-in, first-out basis. Protect from freezing. Store at 40 – 90 deg F. Contents should be stirred using mechanical agitation prior to use. Shelf life expected one year from date of manufacture provided the material is stored at proper temperatures and containers remain tightly closed.
