

## ***In Research & Development***

# **Quickette™**

## **Combat Tourniquet**

- An innovative new compact manual tourniquet easily applied with one hand
- Allows for controlled application and release
- Prevents histological damage

# **ReZorb™**

## **Resorbable Hemostatic Wound Dressing**

- A completely resorbable hemostatic wound dressing designed for internal wounds and surgery comprised of a dissolving/resorbable sodium polyacrylate copolymer gauze impregnated with a resorbable integrin (glycoprotein) linked kinase hemostatic agent.

# **AMMPS™**

## **Approximating Manual Multi-Pronged Stapler**

- A manual skin and fascia stapler which allows simultaneous approximation of the tissue over the length of the wound
- Conforms to irregular wound shapes and lengths
- Designed for temporary wound closure of battlefield casualties
- Easily removed without tools
- No applicator gun required
