Tharaldson Ethanol is proud to partner with Summit Carbon Solutions as we see long-term benefits to our shareholders, local farmers, and our community.

- Summit Carbon Solutions' ethanol plant partners, including Tharaldson Ethanol, will be able to **sell their product at a premium** in the increasing number of markets that have low carbon fuel standards.
- Opening these new marketplaces will **maintain strong land values and commodity prices**, while **improving the long-term economic outlook** for ethanol producers and North Dakota landowners.
- This project will **support local businesses, suppliers, and workers** to provide a meaningful, ongoing boost to the economy of local communities.
- Summit Carbon Solutions will create **thousands of high-quality jobs** during construction and **hundreds of full-time jobs** once operational.

"I agree and strongly believe that **carbon capture and sequestration** should be an important part of our future, particularly the **Summit Carbon Solutions project**. With more than 5,000 miles of CO₂ pipelines already in operation in the U.S. and carbon capture technology deployed at more than 40 ethanol plants nationally, Summit Carbon Solutions is offering a proven, safe approach that will **drive economic growth, improve environmental outcomes, and boost critical industries in North Dakota.**"
