

ALLOCATION ANNOUNCEMENT

LINDMORE IRRIGATION DISTRICT GROWERS

The Board of Directors has approved the following water allocation and rate:

Water Allocation: 0.32 AF per acre of land at a cost of \$212.00 AF of water for non-pumped, \$222.00 for pumped, and \$315.00 for other supply.

Start Date: March 16, 2022

Water year inflow into Millerton Reservoir (where Lindmore ID gets its water) is estimated to be about 75% of normal. This used to mean Lindmore ID would receive about 75% Class 1 (25,000 AF). However, this year the USBR is allocating 15% Class 1 (5,000 AF) to Lindmore ID. This small allocation from the USBR is because they are reserving 254,000 AF of water for the San Joaquin River Settlement and another 200,000 AF of water for releases into the San Joaquin River for the Exchange Contractors. There are substantial efforts by FWA and the District to reduce both of those system allocations and increase Lindmore ID supply from Millerton. With these efforts, there is optimism that the allocation to Lindmore ID from the USBR will increase as will the amount of water available to landowners. We will have more information on any change in the allocation sometime in May or June and will provide an update.
