

2017 Kids' Lineage

Belle's Doeling is out of GHK Cherokee Fiddler and Sunboy 117 Loverboy- who passed along the best maternal traits in the Kiko breed.

Oreo's Doeling is out of Tasman Zorro who is responsible for most of the size found in today's Kikos.

Laney's Doelings are out of SKY 408 SportsKat, Betula Hill Moneymaker, Tasman Aristocrat and Goatex Goliath- which early breeders said was probably the largest Kiko buck imported into the US.

Call Me Angel is an Iron Horse granddaughter and has Tasman Zorro on both top and bottom.

Gazelle's bucklings and **Nikko's** buckling have the same lineage. These are awesome bucklings with genetics to match. They have Apache Loverboy, SportsKat, Sunboy Stanton "Nick", Goatex Generator and Betula Hill Moneymaker (whose young bucks have placed in the top 10% of the performance testing done since the beginning of the Ft. Valley, GA testing).

Trudee's buckling has both sire and dam out of Blue's Son lineage who is in the Kiko Hall of Fame. His genetics have been proven in multiple forage tests. His kids are very fast-growing, well-made kids that exhibit good parasite resistance and hardiness.

Oreo's buckling- dam is out of Tasman Zorro who is listed in the Kiko Hall of Fame. He is responsible for most of the size found in today's Kikos. His sire is out of Sunboy Stanton "Nick" and Goatex Generator.
