One State, Two Initiatives: Indiana's Embrace of e-Transcripts and Credential Engine

Ken Sauer, Ph.D.
Senior Associate Commissioner and Chief Academic Officer
Indiana Commission for Higher Education

May 2, 2018

Overview

- Indiana e-Transcript Program
- Indiana Scale-up of Credential Engine
- How these two initiatives and others fit together in a larger context, including:
 - Emphasis on Competencies
 - Use of Standards (XML and CTDL)

Indiana e-Transcript Program

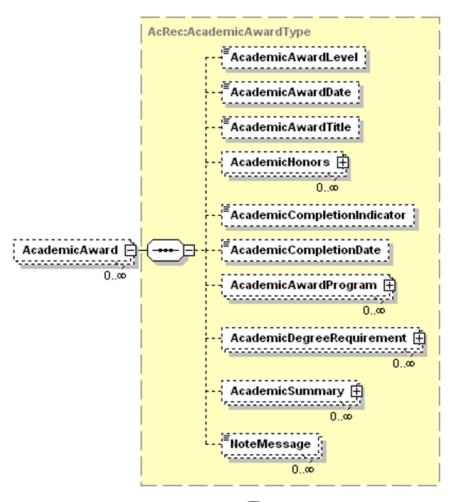

Indiana e-Transcript Program

- The Program from Past to Present
 - High School to College
 - Since 2005, more than 1.5 million high school transcripts have been sent
 - About 200,000 are now sent each year
 - Now sending transcripts as XML data files, as well as PDF's

Indiana e-Transcript Program PESC Schema

Indiana e-Transcript Program Interlocking Responsibilities

Legislatively Mandated Responsibilities

Indiana Commission for Higher Education

- Receives State Appropriation
- Administers the Program
- Contracts with Parchment

Indiana Department of Education

- Issues the common e-Transcript
- Reflects state mandates on e-Transcript
- Communicates with School Districts

Indiana Public Colleges and Universities

- Specifies data fields needed for admission

Parchment

- Provides e-Transcript Platform

Indiana e-Transcript Program High School SIS Vendor Data

Indiana e-Transcript Program - High School to College
Public High Schools and Students by Type of Student Information System

Group /	۹ - Hig	h Schoo	ls Using I	Ma	jor SI	S Vend	lor

Indiana e-Transcript Program Vendor Infrastructure

Indiana e-Transcript Program The Emerging Future 1

- Determining eligibility for state financial aid
- Harvesting more data for more granular analysis around student success
- College-to-College XML e-Transcripts
 - Multi-Directional Transfer
 - Reverse Transfer
 - Dual Credit

Indiana e-Transcript Program The Emerging Future 2

- Comprehensive Learner Records/Enhanced Transcripts
 - Competencies
 - Certifications
 - Workplace Experiences
 - Workplace Skills
 - Project-based Learning
 - Critical Thinking

Credential Engine

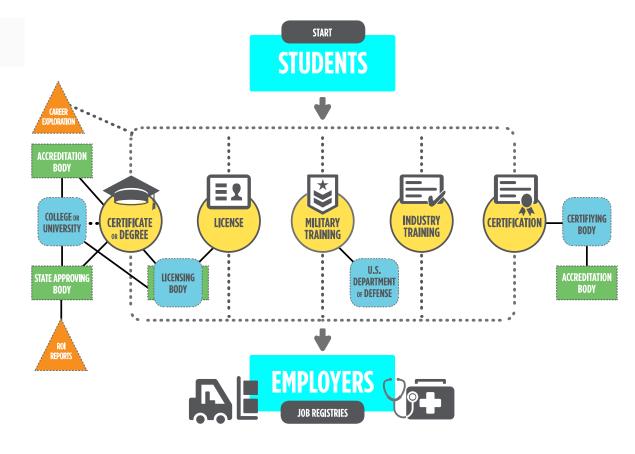

Indiana Scale-up of Credential Engine

- The Scale-up from Past to Present
 - Indiana: the first statewide scale-up of Credential Engine
 - Initial emphasis on health-related credentials
 - Half of the grant went to incorporate military allied health credentials
 - Work has gone far beyond initial emphasis

Essential Credential Engine Connections

Credential Engine Indiana Credentials and Organizations on the Credential Registry

Number of Indiana Organizations (Credential Providers)				
All Public Colleges and Universities	16			
Non-Profit Universities	2			
All Health Licensing Boards	20			
Total	38			

Number of Indiana Credentials			
Certificates	275		
Associate Degrees	259		
Baccalaureate Degrees	176		
Graduate Degrees	164		
Health Licenses	33		
Total	907		

Credential Engine Use Cases 1

Healthcare Industry – By publishing all health-related credentials in Indiana on the Registry—such as certificates, certifications, licenses, and degrees of all types and levels—prospective students can better search for and understand their education and training options in the state and the competencies acquired through these credentials, helping students make more informed decisions.

Military Training and Experience – Indiana has put an emphasis on translating military training and experience into meaningful college credit. The Registry shows the Military Bridge programs that are connected with Indiana's institutions and the Defense Department's Medical Education Training Campus (METC), allowing service members and veterans to better understand their options for civilian employment in related fields.

Dual Credit – Including Career Centers and associated Career Technical Education programs on the Registry will allow students and advisors to see which credentials can be earned from Early College Programs and will eventually show related jobs from employers.

Apprenticeships – Apprenticeship information will highlight the connections between institutions, apprenticeships, and employers.

Credential Engine Use Cases 2

Next Level Jobs – Incorporating Governor Holcomb's Next Level Indiana initiative, Credential Finder will allow users to search for credentials in high-priority industries driving Indiana's economy forward. The searchable information shows the programs that are associated with the Workforce Ready Grant, which pays the tuition and mandatory fees for working-age Hoosiers to earn a high-value certificate at Ivy Tech Community College or Vincennes University.

Career Exploration – In the future, the Registry data will be connected with the <u>Indiana Career Ready</u> website. Some of the tools on the site are mandatory exploration tools for high school students, and the Registry information will add additional layers of information, such as competencies, career pathways, and return on investment.

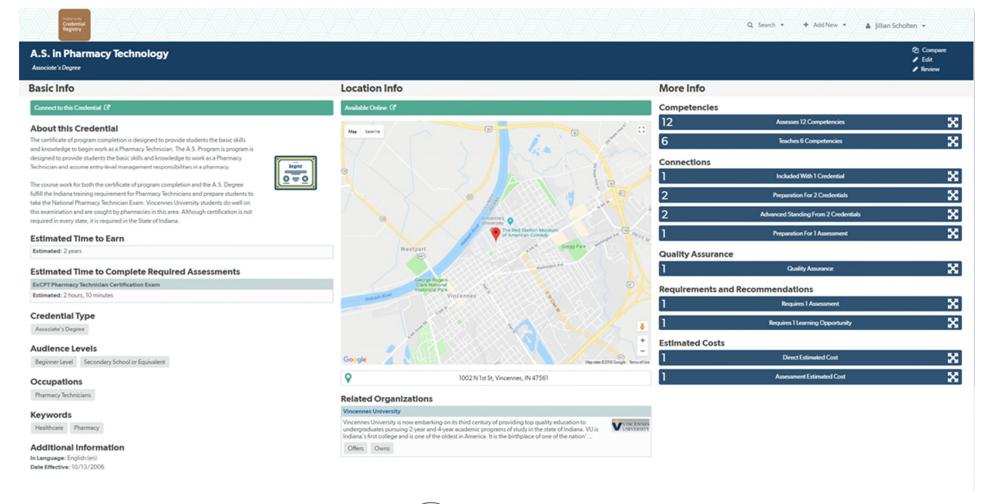

Return on Investment Applications – Indiana will include information about the return on investment for each credential in the Registry. Return on Investment information can help students and advisors make more informed decisions on potential career pathways.

Digital Credentials – Indiana has a strong partnership with Parchment, including work with the Indiana e-Transcript which will soon incorporate Registry data, so students are armed with rich data about their degrees and can better communicate that information to future employers.

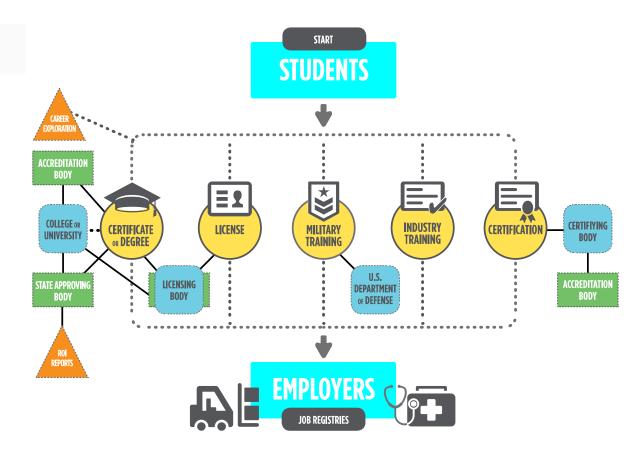

Credential Engine A.S. in Pharmacy Technology

Essential Credential Engine Connections

Points of Convergence

- Standards facilitate convergence
- Aligning Competencies
 - Mastered by Individuals
 - Embodied in Credentials
 - Needed by Employers
