

Welcome to Whalen Chiropractic Clinic, P.C. Today we will be working together. The foundation of our work is spinal health, using manual therapies (cranial, visceral, muscle energy) and gentle spinal manipulation, guided by the following principles:

- ❖ The body has an intrinsic ability to heal itself. By supporting the optimal functioning of your nervous system, you will move toward optimal wellness.
- ❖ Each of us is responsible for our health. Therefore, active participation and clear communication by both of us is essential.
- ❖ Healing is a **unique process** for each individual. I choose to respect and facilitate **your** process.

Our work begins with an evaluation, discussion of the results, and a joint decision-making process on the components of your individualized treatment program.

I bring to these sessions a background in psychology, chemistry, and social work. I completed my Doctorate of Chiropractic, an intensive post-graduate, four-year degree, at Palmer College of Chiropractic-West in Sunnyvale, California. I have pursued additional training in Gentle Spinal and Soft Tissue Manipulation, Cranial and Visceral Manipulation and Therapeutic Touch. I have been practicing since 1990.
