## LETTER OF INTRODUCTION

PEPPERTREE AIR SOLUTIONS is a leading HVAC flexible duct and fittings manufacturer, established and licensed by FLEXMASTER COMPANY Ltd. in 2008. Both Peppertree Air Solutions and Flexmaster Company Ltd. are owned and operated by Perry Philp.

Flexmaster Company Ltd. was established in 1960, and developed machinery and processes to manufacture HVAC flexible duct utilizing an interlocked external helix design instead of using adhesives which degrade over time. This design provides an extremely durable, air tight and leak resistant flexible duct that holds up to high negative and positive pressures and maintains its shape in bend configurations. Flexmaster Company Ltd. licensed their manufacturing equipment, processes and technical expertise to partners in Australia, Canada, India, Japan, Singapore and the USA. One of the licensees was Flexmaster USA whose license agreement has since expired.

All of Peppertree Air Solutions flexible duct products have passed the rigorous testing requirements necessary to be UL listed, meet NFPA 90A & 90B ASTM standards and are Union made. The insulated products are wrapped in Owens Corning Greenguard children and school certified fiberglass insulation.

Flexmaster Company Ltd., Peppertree Air Solutions, and our representatives would like to work with you to have Peppertree Air Solutions listed in your specifications. We are happy to provide any product information, samples, quotes, or any other information you would like to see.

Our representative is :

Sincerely,

Perry Philp

President  
Flexmaster Company Ltd.
