Ref: Reference letter

Hranec Corporation is the largest ductwork fabrication facility signature with Local #12. We manufacture Single Wall Spiral Ductwork, Double Wall Spiral Ductwork, Single Wall Oval, Double Wall Oval, Round Welded Pipe, Rectangular Slip & Drive, Rectangular TDC/Ductmate, Rectangular Double Wall and Rectangular Welded.

Our products are sold through out the United States and even in other countries. Local #12 has worked very well with our manpower demands as we continue to grow. Fluctuations in man power expenditure are always a few degrees more difficult as to the seamlessly unpredictable process of small to enormous ductwork orders that come in on tight deadlines.

Our goals are to have the best and latest technology in sheet metal fabrication equipment to produce quality and available ductwork to all of our customers. Of course we need the manpower which Local 12 provides to operate all of the newest and most sophisticated sheet metal equipment that the manufacturers are placing on the market for us to take advantage of.

Our direction reflects our longevity for success.

Sincerely

Steve Hranec
President Hranec Corp.
