Subject: THECO Electric Performance on FY12 Hangar and AMU Project

Dear Mr. Hagan,

I just wanted to write you a quick letter to express my thanks and gratitude for a successful project. Even though we have never worked on a project with THECO Electric previously, the project went better than could be expected. While we did have some minor issues regarding submittals early on, your team took our instructions and direction very seriously and did an outstanding job getting this project to the finish line.

I would like to point out some of the outstanding members on your team for special recognition as they were instrumental in our success and I believe went above and beyond what was expected. Cliff Warrick was an extremely valuable member of this team as lead superintendent. His willingness to push schedule, complete work on or before deadlines and his dedication to work through tough issues is highly commendable. Cliff always met his deadlines and was extremely reliable, always doing what he said he would do. Hadley Gilbert should also be considered as an invaluable asset to this project as his professionalism, cooperative spirit and knowledge were extremely helpful to Hensel Phelps and the Corps of Engineers in reviewing and solving potential issues before they became problems, negotiating change orders and pointing out possible conflicts and design errors. Lastly, Aaron Evans did a fantastic job in assembling submittals, reports, and coordinating work. He was also extremely important in the latter part of the project in assisting Cliff for the final push to completion.

Never having worked with THECO Electric before, I have to say that I am impressed with the crew that you assembled for this project and would absolutely enjoy the opportunity to work with them again.

We thank you and wish you continued success in future projects.

Sincerely,
HENSEL PHELPS CONSTRUCTION CO.

Jesse Boyle
