Water Meter Replacement Project

Attention Atlanta North Cohocton Water District Residents

The Cohocton Town Board has approved replacing all water meter in all homes in the District. The Town's Water Operator, Barry Fairbrother, will need to gain access to your home to complete this work. It should take him around 15 minutes to complete this. He is making his way around the District stopping at homes to see if he can gain access without having to take the time to make appointments with all 250 residents. You may request his identification if you need to. Matt McCarthy, Water Operator, may also be helping Barry on this project.

If when he stops and it isn't a convenient time for you or you are not home you will need to contact Barry at 585-447-0884 to set up an appointment.
