

There is a reason our Iontosonic Facial Treatment is so popular...it is terrific for our skin!

It is an excellent resurfacing tool suitable for all types of skin, effective as microdermabrasion without harming live skin cells.

The machine, designed by dermatologists and plastic surgeons, uses 26,000 pulses of ultrasound per second to deep clean, exfoliate, massage, lift and then infuse the recommended product deep into the skin. It promotes increases blood circulation, thereby promoting metabolism.

The Iontosonic treatment has three phases: cleaning, permeation and lifting.

First your technician will ultrasonically deep cleanse the skin, removing residual make up and deep seated waste material. This phase also exfoliates, removing dead skin cells and sebum while disinfecting and massaging the skin.

Next she will infuse the product best suited to your skin's needs, generally Vitamin C. This will rid the skin of unsightly pigmentation and help with dehydration, fine lines and wrinkles. With repeated treatments, superficial irregularities will be removed causing the skin to look younger and healthier.

The final step is the lifting phase, which increases the blood supply and lymphatic flow by sending pulsed ultrasonic wavelengths combined with small amounts of positive and negative electrical charges to the skin. This creates a deeper level of stimulation, giving a maximum massage effect and resulting in healthier, younger skin that is smooth and elastic.

Benefits include:

- Reduces pigmentation
- Reduces fine lines and wrinkles
- Reduces dead skin build up
- Reduces acne
- Reduces blackheads, milia, ingrown hairs, foreign matter
- deep hydration
- Regeneration of collagen
- Fantastic for mature or menopausal women
- Stimulation of the epidermal cells, creates cell turnover
- Increased muscle tone

Most clients will see a dramatic improvement after only four treatments, but a series of six treatments is recommended. There is no limit to the number of treatments that the client can receive. Iontosonic is fantastic as a monthly facial routine, or as a pick-me-up treatment at any time.

We offer three 10 minute Add-On services with the Iontosonic for an additional charge – the Ultrasonic Lift, the Rejuvalite and a face, neck and shoulder massage.

The Ultrasonic Lift cleanses, revitalizes and balances the skin. It increases cell metabolism and the circulation of lymph fluid. It firms the skin and stimulates the production of collagen and elastin.

The Rejuvalite is an anti-aging, rejuvenating and healing treatment that harnesses the naturally positive effects of both red and blue light wavelengths to replenish and repair skin cells. It provides a safe, natural, non-invasive and highly effective treatment for acne, fine lines and wrinkles, scarring, and pigmentation, poor skin tone and texture.
