### Performance By...

G96V99 has very good performance across all soil types but excels in highly productive, medium textured acres. G96V99 has a semi-determinate ear type so its best performance is at above average planting populations (34,000 and greater plants/a). G96V99 performs well on continuous corn acres but excels on rotated acres.

1-9 Scale: 1 = Best, Tallest or Highest; 9 = Worst, Shortest or Lowest; (-) = Not Available, NA = Not Applicable.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
