Comments (weather, crop development, etc):					
Estimates are for planted acreage and do not include losses due to drown out, etc.					
The NCBDA has a mandatory Stocks Report which is mandated by the ND PSC. The reports are for Stocks on hand as of August 31 & December 31. With publication a month after those dates.					
Because the NCBDA will have an accurate report for stocks on hand, we did not submit carry over #'s in this report.

This report covers estimates from the State of New York only.					
Comments (weather, crop development, etc):					
Early spring conditions were wet and continued until June 1, farmers continued to plant corn and soybeans until the middle of June. Dry Bean plantings started throughout all of June and continued to about the 6th of July. Plant progress is fair to excellent and we are a week or two behind normal growing season.					
*Carryover includes unshipped inventory but figures include weight sold.
