DESCRIPTION: High quality Browning recurve in very good condition. Bow has no delamination; no cracks; limbs are straight. Tips are in great condition. On the earlier Nomads, Browning put in wedges to reinforce the tips in lieu of tip overlays (see pic on last page). The width of the wedge depended on the draw weight of the bow. For this 42# Nomad, the wedge was much thinner than on a heavier bow. Bow has no drilled holes; No chips, dings or cracks. A couple of very small superficial stress lines in the riser section. No crazing. There is one significant scratch on the face lower limb (this is not a stress line but a scratch in the limb). A few other minor scratches and nicks here and there. Decal is in fair condition. Overall, this is a really nice bow in excellent condition for its age.
