### The reviews are in ...

“Thanks for inviting us to the show. I know how much work it is to stage an event. It takes months of planning and preparation. I especially appreciated the smooth, safe operation of the flight line.”

**Brian O'Meara – Pilot - Broomfield, Colorado**

“Thank You for a great week again this year! ... Appreciate the focus on “open flying” vs “noon show.” Flight line ops seemed easier and smoother this year - credit to standardized traffic control commands. The runway was perfect! Given the weather, being able to grab water at the pilot station was greatly appreciated.”

**Joe Larson – Pilot - South Bend, Indiana**

“Just wanted to drop you and everyone from ASOG team a note that we had a great time ... The event ran smoothly from our point of view ... The weather you planned for was spot on perfect.”

**Jack Kezelian – Pilot - Canton, MI**

“Great show all around. The variety and quality of the aircraft at the show were outstanding. The show was well organized and professional. I'm no expert but from a spectators view the operations on the flight line appeared competent and confident. No one seemed confused or out of place. Good job!”
