Staff and Team Experience with:

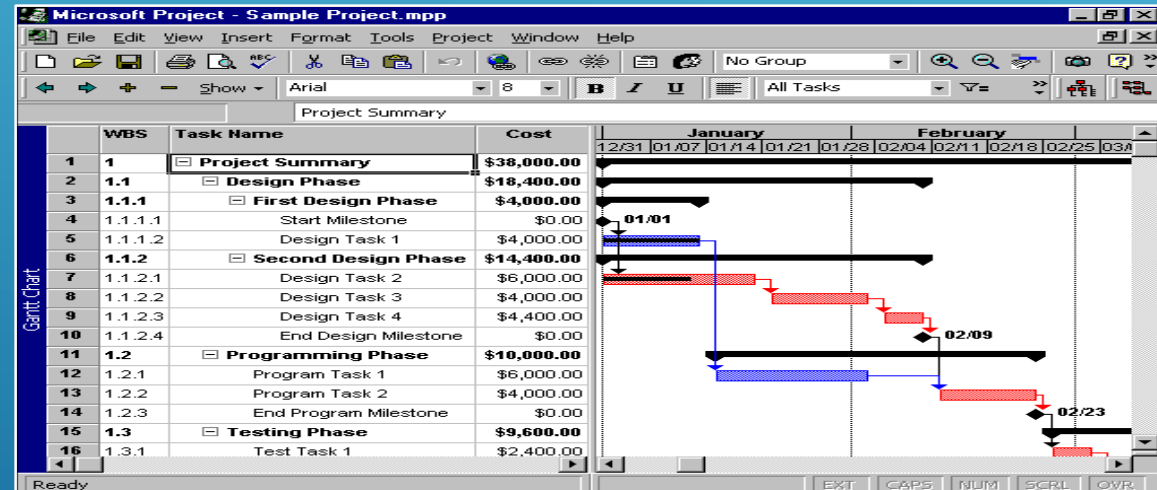

- JMRAP PMO ICES
- MRAP Depot Capacity Eval
- LCCEs for C4ISR systems
- Estimates for Land Systems
- TPCS, STAR-T,
DDACT CCAs
- LCCE support
ABV, M1A1, AAV

AGS Business Case Analysis (BCA) / Cost Estimating

- AGS' Deep Business Case Analysis and Cost Estimating capability spans DoD's most significant programs
- Cost programs highlighted by staff and team experience with multiple Business Case Analyses and Economic Analyses for NAVSEA NGEN MDAP BCAs and Life Cycle Cost Estimates; Defense Satellite IT programs; Homeland Security IT Operations Center alternatives; Navy systems engineering studies
- Staff experience with USMC ACAT I systems including GCSS and SIAP communication and IT programs and Joint MRAP operations, finance and support systems
- LCCEs/ COAs for optical, IFF, drive train and communication systems for Land Systems
- Full support package for LCCE/ COA determination, AOAs, BCAs, TOA and much more

- **Expertise and proven estimating methodologies** for IT and MDAP systems help customers succeed in COA determinations and definitive budget prioritization
- **Diversity in cost services** including LCCEs, TOC, AOA, BCA and COA development ensure experience matches up with requirements
- **Wide experience** in almost every service hardware and software platform ensures estimators can visualize unique system properties, environment
- **Data Confidence Solutions** assures accuracy in each cost element and model construction

It's the details in the estimate work breakdown structure (WBS), knowledge of the program from total operational cost to logistics footprint and data assurance for pinpoint accuracy that ensure customer success.
