Remain Connected – in ANY Hurricane!

Cinetcomm's **defi** hybrid network system is the ultimate multi-band, resilient communications solution, designed to keep operations online whatever Mother Nature throws at you. Hurricane proven, **defi** hybrid communication solutions maintain communication in 200+ MPH (Category 5+) sustained winds.

Extreme weather is no match for the **defi**! –

- **Install at PSAPs, EOCs, Radio Sites and other Critical Infrastructure Facilities**
- **IP-centric LTE, FirstNet and Satellite services keep critical voice, 2-way radio and high-speed data connections alive when normal networks go offline**
- **Resilient, multi-band hybrid network system integrates with existing fixed infrastructure for automatic fail-over**
- **Multiple mounting options – Non-pen frames, pipe, and concrete bases**
- **Operations always remain connected, wherever they are located**

When extreme winds blow, remain connected to the grid...with defi!
