

Scientifically Proven Results to Protect *Your* Investment

Air Scrubber Plus Technology has been studied in controlled university testing for reduction of particulate in the air and contaminants on surfaces. Help protect your home and family against dust, allergens, mildew, smoke, odors, and odor-causing bacteria easily and conveniently with ActivePure environmentally active technology.

¹Testing on behalf of activTek Environmental by Dr. James Marsden, at Kansas State University was conducted to determine the effectiveness of ActivePure® (RCI) Technology for the inactivation of Staph (Staphylococcus aureus), MRSA (Antibiotic Resistant Staph), E. coli (Escherichia coli), Bacillus spp., Streptococcus spp., Pseudomonas aeruginosa, Listeria monocytogenes, Candida albicans, and black mold on stainless steel surfaces at divers contact times in a controlled airflow cabinet. Further testing was conducted for activTek Environmental at the University of Cincinnati Center for Health-Related Aerosol Studies to investigate the novel air purification technique combining aerosol/bioaerosol control mechanisms of unipolar ion emission and photocatalytic oxidation promoted by the ActivePure® (RCI) technique.

Certified Space Technology to Protect *Your* Home

WHAT IS SPACE TECHNOLOGY?

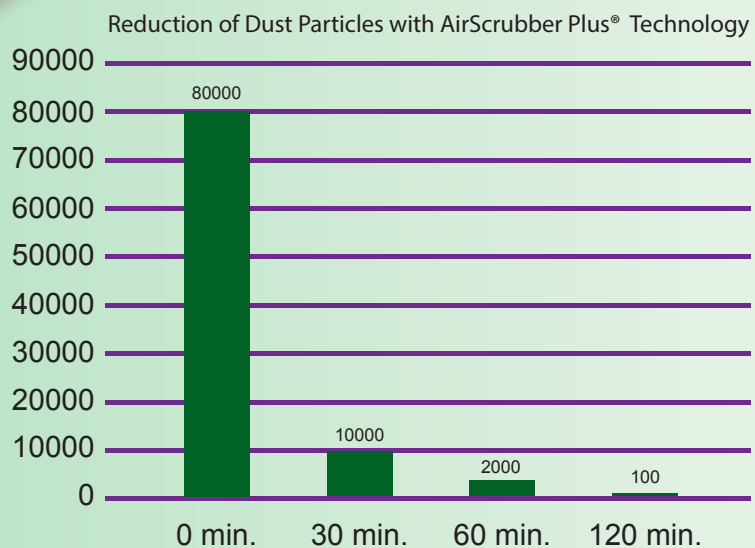

Products and services that display the Space Certification seal are guaranteed to have originated from technologies that came from space exploration.

WHAT DOES THIS MEAN FOR YOU?

Air Scrubber Plus® purification products use a variation of technology originally developed in cooperation with NASA to create a safe atmosphere for astronauts on the International Space Station. This technology is now available to help protect you, your family, and your home from dust, germs, odors, pet dander, viruses, etc.

The Certified Space Technology logo is licensed to activTek by the Space Foundation for use of Air Scrubber Plus® purification products. The Space Foundation recognizes products whose origins come directly from technology or resources derived from the space program.

Enviro Scrubbing Technology® to Protect *Your* Investment

Above tests shows progressive results in reducing particles in the air ranging from .01 to 2.5 um (microns) in size!

Air Scrubber Plus®, with enviro scrubbing technology protects your investment by producing negative and positive charges (ions). These charges cause dust particles to be attracted to one another and clump together. Once the dust particle is large enough, it is caught by your heating and cooling system filter or drops to the floor. This process keeps your heating and cooling system coil cleaner and your family healthier.

1 Testing conducted by Dr. Sergey A. Grinshpun, Center for Health-Related Aerosol Studies, Department of Environmental Health, University of Cincinnati. Testing, Peer Reviewed. Study published: Environmental Science & Technology / VOL. 41, NO. 2, 2007

Highest Standard Product to Protect *Your* Family

Clean

Reduce contaminants

Do you worry about what is being brought into your home? Contaminants from school, daycare or the office follow us home on hands, clothes and shoes and land on our doorknobs, countertops and floors. Air Scrubber Plus® contains ActivePure Technology, proven to destroy up to 99% of all surface contaminants, scrub, purify and clean the air you breathe by reducing approximately 90% of airborne contaminants.

Deodorize

Banish lingering odors

Whether burnt dinner, a family member that smokes or a pet that's just come in from the rain, there's not much you can do about some of life's odors. Now there's something you can do about it. Working through your heating and air conditioning unit, the Air Scrubber Plus® is a unique photocatalytic device that will significantly reduce dust, pet dander and odors in your home. You will be able to reduce common smells such as pet odor, cigarette smoke, paint fumes, mold smells and of course the occasional burnt food odor.

Purify

Reduce irritating particles

Lack of sleep, sneezing, itchy, watery eyes...its allergy season. Dust, mold, pollen or many of the other pollutants that can cause irritation and allergy symptoms. These contaminants can be reduced with the Air Scrubber Plus® ActivePure Technology uses specialized light waves along with a proprietary catalytic process that creates enviro-scrubbing molecules of oxygen and hydrogen which purify your air and reduce irritating particles that can irritate allergy symptoms.

QUICK FACTS:

- Designed to help reduce Indoor Air Quality risks known as Sick Building Syndrome
- Attaches easily to your Heating & Cooling system
- Uses proprietary light waves along with a specialized catalytic process to keep your home cleaner 24/7
- Requires only 18 watts of electricity
- Complies with all Federal EPA, FDA and OSHA regulations including the California Air Resource Board Regulations
- Made in the USA

Certified to: UL1598/C22.2 No. 250.0-08

Quality of Life Home Improvement Questionnaire

- Does anyone in your family suffer from allergy symptoms? YES NO
- Do you ever smell cooking odors, pet odors, smoking odors or musty smells in your home? YES NO
- Would you like to reduce dust, pet dander, or pollen in your home? YES NO
- Is there anyone in your house that can't afford to get sick? YES NO
- Would you like to reduce up to 99% of harmful contaminants on surfaces such as kitchen counter tops and bathrooms? YES NO

If you answered: YES to one or any of these questions. Installing the Air Scrubber Plus® in your home could improve your quality of life.
