

Diabetes Nation™

educating. inspiring. encouraging.

1 in 3
children born
today will
develop diabetes
as an adult

By Educating...

For this generation of Americans, our goal is to enhance diabetes prevention and awareness in the public and private sector, thereby empowering them to influence those that follow.

By Inspiring...

We strive to inspire professionals to keep pace with the accelerating complexity of diabetes using a multi-faceted approach enabling them to positively influence their performance.

By Encouraging...

We plan to affect the course of diabetes by encouraging policy makers to help implement strategies for corrective actions.

Dedicated to a Healthy Future

Diabetes Nation's mission is to inspire healthcare professionals to keep pace with the accelerating complexity of treating diabetes, using simple methods to positively influence performance. Long term goals are to:

- Share successful models of diabetes care through physician collaboration;
 - Provide educational programs and materials to simplify patient care decisions;
 - Demonstrate the importance of electronic-based information tracking at the primary care level to improve the quality of health care and reduce costs.
-
