

GRINDING DRUMS

Our new or refurbished drums offer long-life and deliver exceptional performance.

- specially constructed
- computer-engineered designs with synchronized pattern flites
- we ensure an end plate run-out of less than .010" for long bearing life
- welded in accordance with ASTM standards
- pre and post welding heat treatment
- modified end rings ensure straight cuts and reduced wear
- custom-built to meet your milling requirements- choose: center fill, left side fill, right side fill
- balanced to reduce machine vibration
- .750" drum wall thickness and 1.00" machined end plate.

Every drum we manufacture comes standard with its own Identification plate and serial number.

We also offer:

- replacement bits, bases, blocks and holders
- skid shoe wear plates
- pullers, punches, and all accessory tools
